

FIRST NATIONS INFRASTRUCTURE INVESTMENT PLAN (FNIIP) CHECKLIST

This tool provides a final check on the projects included in the FNIIP. Use the information from the Infrastructure Needs Scoping Sheet from the Step 8 Toolkit and the Implementation Strategy Tables from the Step 9 Toolkit to complete this checklist. Only projects that meet all of these considerations should be listed in the FNIIP.

CONSIDERATIONS

- ☐ The project directly supports the community's vision and goals, or otherwise reflects what is important to the community.
- ☐ The project addresses a critical risk or has been identified as a high priority for the community.
- ☐ The project meets a specific need for the community, and you have thought of both current and future needs.
- ☐ You have considered all of the options to meet the community's need and this is the best one.
- ☐ The project is located in a place that makes sense within the overall community, given consideration to health and safety, and broader community goals and objectives.
- ☐ You have considered initial capital costs and ongoing operations and maintenance costs of this project and will look at options for achieving the lowest life cycle cost.
- ☐ Funding sources have been explored for both initial capital costs and ongoing operations and maintenance.
